

ATHENS / MARCH 2024 / FOR IMMEDIATE RELEASE

## **Technohull flagship Alpha 50 ready for its US debut at 2024 Palm Beach International Boat Show**

- The Alpha 50 establishes a benchmark in its class with a sleek and contemporary design philosophy
- US premiere at PBIBS 2024 (March 21-24)
- Additionally, on display the Explorer 40S and the Omega 47
- Stand position: Ramp 10

Making its highly anticipated debut in the United States at the 2024 Palm Beach International Boat Show (March 21-24), Technohull will unveil the flagship Alpha 50 in total black, featuring triple Mercury V12 600 hp engines and sea keeper stabilization system.

Additionally, on display at Ramp 10, two other exceptional creations of the Greek shipyard: the Explorer 40 S, powered by twin Mercury 500R engines, and the Omega 47, boasting a twin Mercury V12 600hp configuration, which have garnered great success among enthusiasts also during the recent Miami International Boat Show.

Technohull's presence in the United States is expertly represented by KMB Yachting ([kmbyachting.com](http://kmbyachting.com)), a leading partner renowned for its exceptional sales services and comprehensive after-sales training and support.

### **The evolutionary design of Alpha 50**

The Technohull Alpha 50 introduces a groundbreaking design concept to the US market, challenging the conventions established by its predecessors while remaining true to the brand's high-performance DNA and distinctive design principles. This evolutionary design incorporates cutting-edge aesthetics, delivering an unparalleled visual and tactile experience. With a focus on generous

exterior space and expansive lounging areas, it offers a refreshing approach to enjoying a day at sea without compromising on performance.

Characterized by its clean, aerodynamic, and sleek appearance, the Alpha 50 boasts streamlined surfaces that surpass its predecessors. This innovation results in an exceptionally spacious and well-designed deck and interiors, all while maintaining a sharp and aggressive silhouette. f

Staying true to Technohull's commitment to quality cruising experiences, the Alpha 50 prioritizes excellence at the helm. It boasts an aerodynamic hardtop with a full glass windshield, ensuring shelter and protection from the elements even at high speeds. The helm station features a broad, fully equipped console housing state-of-the-art digital management systems, which enhance the overall driving experience. Furthermore, the helm seat configuration includes double rows of triple shock-absorbing seats, upholstered in premium marine fabrics, showcasing meticulous attention to detail.

### **Elevating On-Board Experiences**

Reinventing deck design, the Alpha 50 introduces fresh perspectives on onboard living, setting a new benchmark for luxury in the market. At the aft deck, a unique island sunbed arrangement accompanies various deck layouts catering to diverse owner preferences. Wide passageways lead to the spacious bow area, which boasts an expansive sunbed and a console seat, creating the perfect setting for day-long relaxation.

### **Elegant and functional onboard spaces**

A pantographic door at the side console entrance unveils a cabin exuding luxury and comfort. Featuring an oversized double bed, ample storage and a separate head with a shower, the finely crafted cabin epitomizes elegance. Infused with captivating details and premium materials, the interiors of the Alpha 50 elevate the onboard living experience, distinguishing this new model significantly.

The Technohull Alpha 50 seamlessly merges modern luxury with functionality, leaving no aspect overlooked. Premium equipment and top-quality materials

ensure a stylish and comfortable onboard ambiance. Unique features, such as the dual-opening island sunbed that offers extensive storage, multiple storage compartments throughout the vessel, and the option for a well-appointed space beneath the bow sunbed, elevate functionality to unprecedented levels. Additionally, the Alpha 50 provides the flexibility of a cabin for two or a single crew cabin beneath the bow sunbed, underscoring its dedication to luxury and practicality.

### **Exceptional Performances**

The Technohull Alpha 50 features a semi-straight, wave-piercing bow hull design optimized for outstanding performance, taking into account the boat's remarkably spacious deck.

With Technohull's patented Dynastream hull design, the Alpha 50 exceeds expectations, offering high speeds, exceptional seakeeping, excellent handling even in rough weather conditions, unbeatable comfort, and maximum efficiency. Its super-efficient hull design enables high speeds with minimal fuel consumption, matching that of Technohull's smaller models.

Engine options range from two to five outboard units, and inboard options include twin inboard diesels, all showcasing the brand's high-performance legacy.

### **TECHNOHULL ALPHA 50 SPECS**

<b>Length Overall</b>	14,95 m (15,11 for the inboard version)
<b>Beam</b>	4,72 m
<b>Hull</b>	Deep V with ventilated steps
<b>Light Ship Weight</b>	7,000 kg
<b>Fuel Capacity</b>	1,800L
<b>Water Capacity</b>	200L
<b>Max Engines</b>	5X500hp outboard / 2 X 435 hp inboard
<b>Engine Options</b>	Outboard / Inboard
<b>Number of Passengers</b>	16

**Design Category**      B Offshore
